

**IN THE SPECIFICATION**

Please replace the first paragraph under the heading “Detailed Description” on page 4 (lines 14-20) with the following paragraph:

In **Figures 1 and 2**, described in greater detail below, a layered stack 100 includes a substrate 110, a first layer 120, a second nanoporous layer 130, and an additional layer 140. In preferred embodiments, the first layer 120 in layered stack 100 includes either a continuous layer of non-volatile component 128 (**Figure 1**) or voids 125 and a non-volatile component 128 (**Figure 2**). The second layer 130 in layered stack 100 includes voids 135 and non-volatile component 138. The additional layer 140 in layered stack 100 may include voids 145 and non-volatile component 148. Volatile components 126 and 146 are not shown in the Figures.
